

Runcton Holme Parish Council

Annual Meeting April 2022

Report by Chairman

The Virus is still with us and will continue to be so for a long time if not forever. Parish Meetings have been virtual and also face to face, which I prefer, the Government has withdrawn permission for virtual meetings to continue. Things have moved on with home deliveries increasing which is I feel is a pity as shopping is part of the life experience but most people do not have the time.

Speeding is still a continuing problem and any Police presence now gone. A meeting was held on School Road between highways representatives, parish, district and county councillors and various options were discussed, observations and investigations are to be carried out-results are awaited.

At the above meeting the flooding problems on School Road were also discussed and Highways are going to carry out surveys and possibly install further drains to take the water away.

A meeting will hopefully be arranged between the parish councils along the A10 from Tottenhill to Downham to bring pressure to solve the speeding and continual accidents that are happening.

A new dog waste bin has been installed on School Road.

Many will have noticed the smell of sewage along the road by Woodlakes and this is being investigated by the District Council and drainage board.

The Parish Council is supporting the drive to get a number of defibrillators installed in the parish and fundraising is progressing really well with help from the Scouts, Red Barn, the School, Social Club and residents of the Parish, further write-ups will be found in the Newsletter publication of which is imminent.

Robert (Bob) Pearman
Chairman-ex. As I have now resigned.
